Re: Paperwork of owndership for Willys 1951

Hello,

Here is the paperwork for the Willys. You'll find a letter from the Jefferson County Commission, original stickers circa 1997 that were given to the previous owner which I include only because we have them, and the Alabama Department of Revenue (motor vehicle registration tag and tax receipt) which serves as the pink slip. I have signed it and include another ADR slip signed by the sellers, Broadway Auto Sales, to the previous owner. I have signed the ADR slip transferring ownership to you and you'll find another two blanks for your future use.

I hope you gently enjoy the Willys! Thank you for facilitating the continuance of the valued work that the Lustgarten Foundation for Pancreatic Cancer Research organization does by purchasing our beloved Willys.

Sincerely,

A handwritten signature in black ink, appearing to read 'Cari Modine', written in a cursive style.

Cari Modine

1	Install overdrive harness and route through engine compartment. Found that governor did not work. Remove governor and disassemble. Found broken contact. Replace governor top piece with new contact. Reinstall governor. Attach wire to it. Test ride. Also found that relay was not making contact. Take off relay and clean up contacts. Reinstall relay and road test. Trace out fuel gauge and tail light wires. Found that tail light wire is broken off somewhere in the headliner. Run new wire to tail light and test. Also trace out gas gauge wire and attach. Jack up car and remove all four wheels and drums. Remove all brake shoes and all wheel cylinders. Remove backing plates and clean backing plates. Free up adjusters. Remove rear axle shafts and remove inner axle seals. Install new inner rear axle seals. Reinstall backing plates. Install new wheel cylinders. Clean and repack rear wheel bearings. Reinstall axle shafts. Make new gaskets for rear axle outer seal flanges. Install new rear axle outer seals. Install new brake hoses. Install all new brake shoes. Found that rear brake lines were rotted beyond repair. Make up and bend rear axle brake lines. Install brake lines. Bench bleed master cylinder. Remove and replace master cylinder. Found that master cylinder was mounted in the wrong hole. Repack front wheel bearings and install new front wheel seals. Install right door panel. Reinstall right window crank handle. Install left window crank handle. Remove and replace horn button rubber pieces. Install wire through steering column and attach connector. Glue contact plate to horn button. Attach wire at bottom of steering column and test. Remove and replace vacuum hose for windshield wipers. Test wipers. Adjust brakes and bleed brakes. Lubricate and adjust hand brake cables and test operation. Road test.	1,900.00	1,900.00
